

RESEARCH CONSORTIUM FOR HEALTH CARE VALUE ASSESSMENT

Our Mission

To promote the pursuit of value in health care delivery in the U.S. by identifying high- and low-value clinical services, tracking the use of such services, and helping to ensure that consumer preferences are incorporated in health care decisions

HOW WE ACHIEVE OUR MISSION

RESEARCH

CONCEPT PAPERS

COLLABORATION

OUTCOMES

Use of a set of 10 clinical services by a commercially-insured population between 2014 and 2016 suggests that **low-value spending had negligible change, while spending on high-value services increased**, but at a slower rate than overall private health care spending.

“ We believe that affordability in health care delivery is best achieved by efficiently allocating costs across the entire budget and spectrum of care. The proper framework is to **move from how much we spend to how well it is spent.**”

- HEALTH AFFAIRS BLOG

“ Affordability in health care is best achieved by **aligning spending with value.**”

Altarum/VBID Health Partnership

Advisory Group

David Meltzer | University of Chicago (chair)
Beth Bortz | Virginia Center for Health Innovation
Peter J. Neumann | Tufts Medical Center
Neel Shah | Harvard Medical School
Steven M. Teutsch | UCLA and USC

350 “Colleagues in Value”

Develop a framework identifying and measuring low-value care

Track inappropriate use of low-value services over time on a state and nationwide basis

Develop a structure for employers to consider low-value service use within their workforce
